

Aker BP ASA

Aker BP ASA's rating reflects its operational scale with a production guidance of 430-460 thousand barrels of oil equivalent per day (kboepd) for 2023, asset diversification across the Norwegian Continental Shelf (NCS), an adequate reserve life, a strong project pipeline and a supportive capital allocation framework.

The company's rating remains constrained by its focus on offshore operations, which entail higher operational risk than onshore operations, and neutral-to-negative free cash flow (FCF) linked to major expansion projects including Valhall and Yggdrasil over the medium term.

Key Rating Drivers

Financial Flexibility Supports Growth: Fitch forecasts EBITDA of close to USD13 billion for 2023, and for it to reduce to USD6 billion by end-2026 based on our price assumption of USD53/barrel from 2026. Even under this conservative price scenario operating cash flow will be more than sufficient to fund its USD20 billion investment programme, given full tax deductibility of investments under the special tax regime for oil and gas in Norway.

Due to the progressive dividend policy, with an ambition of a minimum of 5% growth a year, we forecast funds from operations (FFO) net leverage to rise to around 2.0x by 2026, from 0.5x at end-2022.

Financial Policies Support Rating: Aker BP's capital allocation priorities are: i) to maintain financial flexibility and an investment-grade credit rating; ii) profitable growth; and iii) dividends in line with long-term value creation. It aims to maintain company-defined net debt/EBITDAX below 1.5x. If hydrocarbon prices moderate to significantly lower levels over the long term we would expect the company to update its dividend policy to align with value creation of the business.

Strong Project Pipeline: Aker BP has a strong project pipeline with projects that will enable it to significantly increase its reserve base, most importantly in the Yggdrasil area. The company projects to develop a total of 770 million barrels of oil equivalents (mmboe) in (net) recoverable petroleum resources. In 2022 Aker BP reported proved reserves of 1,251mmboe (1,859mmboe on a 2P basis). Based on 2023 production guidance, Aker BP's reserve life is adequate at 7.7 years for proved reserves (1P) and 11.4 years for proved and probable reserves (2P).

Low Production Costs: Aker BP's production costs decreased to USD8.7/boe in 2022 from USD9.2/boe in 2021, due to its increased exposure to low-cost, high-quality assets following the Lundin acquisition on 30 June 2022.

Input price pressures, resulting not only from general inflation, but particularly oil and gas industry-specific rises linked to step-up of investments to promote energy security, are driving higher future production costs. However, we expect 2023 production costs for Aker BP to be lower at USD7-8/boe, capturing efficiency measures and a full year of production from the Lundin assets.

Largest Independent Producer in Norway: Aker BP is the largest independent oil and gas producer on the NCS, which according to the Norwegian Petroleum Directorate holds 18% of total oil reserves in the country and 8% of total hydrocarbon reserves. In 2022, it produced on average 309.2kboepd, a 48% higher run-rate than 2021, driven by the Lundin acquisition. However, its single jurisdiction focus implies limited geographic and hydrocarbon diversification, which remains a rating constraint.

Energy Transition Under Way: Aker BP has very low scope 1 emissions with carbon intensity of production of below 3 kg/boe, target methane intensity below 0.1% and no scope 2 emissions (from 2023 full renewable power sourcing). Around 83% of the company's operations have been electrified. Its decarbonisation strategy aims to expand electrification towards 100% by 2040, implement energy-efficiency emission reductions over time and achieve net zero scope 1 and 2 emissions by 2030 by neutralising any residual emissions with high-quality carbon removal projects.

Financial Summary

Rating Derivation Relative to Peers

Aker BP is well-positioned versus independent exploration and production investment-grade peers, including Wintershall Dea AG (BBB/Stable) and Diamondback Energy, Inc. (BBB/Stable).

Aker BP's production mid-point guidance for 2023 of 445kboepd compares well with Wintershall Dea's of 338kboepd (excluding Russian assets) and Diamondback Energy's 435kboepd. Aker BP's assets are concentrated on the NCS (1P reserves of 1,251mboe) and Diamondback Energy's in the Permian-basin in the US (1P reserves of 2,033mboe). Wintershall Dea has wider geographic diversification across the portfolio (1P reserves of 996mboe).

Our forecast for Aker BP indicates negative FCF over the next four years, whereas for Wintershall Dea we assume neutral FCF and for Diamondback neutral-to-positive FCF.

Higher-rated US peers Pioneer Natural Resources Co. (BBB+/Stable) and Devon Energy Corporation (BBB+/Stable) have higher reserves and production of 685kboepd and 653kboepd respectively (2023 guidance), but similar reserve life at 8.5 years and 7.6 years with neutral-to-positive FCF generation and very low leverage.

These companies have more flexible dividend policies, with a fixed component that increases year to year (similar to Aker BP, but in proportion to earnings the base is lower) and a variable component that is linked to FCF. This is a safeguard to preserve positive FCF and promote incremental debt reduction over time.

Many upstream oil and gas companies in the US target gross debt reduction to mitigate increasing business risks linked to the energy transition and limited options for them to reduce scope 3 emissions from use of their product. These companies maintain very low leverage, while gearing will increase for Aker BP due to its growth investments over 2023-2027.

Outstanding debt for all these companies could be repaid from cash flow generation over the medium term if macro conditions weaken for the wider oil and gas sector but the horizon for Aker BP to repay its debt would be longer, particularly given a high tax burden in Norway.

Importance: Higher (Red), Moderate (Blue), Lower (Light Blue)

Rating Sensitivities

Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade:

- Material improvement in the business profile, including scale and diversification
- Financial policies that support a more conservative financial profile through the cycle, including a more flexible dividend policy
- FFO net leverage below 1.0x or EBITDA net leverage below 0.5x on a sustained basis

Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade:

- FFO net leverage well above 2.0x or EBITDA net leverage well above 1.5x on a sustained basis
- Aggressive M&A, dividend payments or other policies materially affecting the credit profile and leading to consistently negative FCF

Liquidity and Debt Structure

Strong Liquidity: At end-1Q23 Aker BP had USD6.68 billion of liquidity, including cash and cash equivalents of USD3.28 billion and an undrawn revolving credit facility (RCF) of USD3.4 billion that is available until May 2026. It has no debt maturities until January 2025.

Fitch's rating case indicates negative FCF over the medium term linked to sizeable capex and increasing dividends. Aker BP targets to maintain a minimum liquidity buffer of USD3 billion at all times. As a result, we would expect the company to raise additional funding by early 2025.

ESG Considerations

Unless otherwise disclosed in this section, the highest level of ESG credit relevance is a score of '3'. This means ESG issues are credit neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. For more information on Fitch's ESG Relevance Scores, visit www.fitchratings.com/esg.

Climate Vulnerability Considerations

We are currently in consultation with our stakeholders on a proposal to support consistency and transparency in the way Fitch Ratings identifies and addresses potentially credit-relevant climate risks in its credit rating process. This would include adding the section below to all Rating Reports. To learn more about the approach, and provide feedback, please see [Climate Vulnerability in Corporate Ratings - Discussion Paper](#) or contact climate.vsfeedback@fitchratings.com.

The FY22 revenue-weighted Climate Vulnerability Score (Climate.VS) for Aker BP is 57 for 2035, which is average for the oil and gas sector. Key transition risks arise from potential reductions in demand driven by policies designed to reduce the use of oil and gas in the global economy and, in the shorter term, from policies designed to limit the greenhouse gas emissions from the production of oil and gas.

These risks do not have a material influence on the rating, given the very long-term timescale over which the transition may take place, and uncertainty regarding the extent and nature of changes and markets' and companies' reaction to them.

Aker BP has very low scope 1 emissions with carbon intensity of production of less than 3kg/boe, target methane intensity below 0.1% and no scope 2 emissions (from 2023 full renewable power sourcing). Around 83% of operations have been electrified. The decarbonisation strategy aims to progress electrification towards 100% by 2040, implement energy-efficiency emission reductions over time and achieve net zero scope 1 and 2 emissions by 2030 through neutralising any residual emissions with high-quality carbon removal projects. The company does not have scope 3 targets which may put pressure on its operations in the long term when energy transition starts affecting demand.

Key Assumptions

Fitch's Key Assumptions within our Rating Case for the Issuer

- Base-case assumptions for Brent at USD85/bbl in 2023, USD75/bbl in 2024, USD65/bbl in 2025, USD53/bbl over the longer term
- TTF gas price at USD20/mcf in 2023 and 2024, USD10/mcf in 2025, USD5/mcf thereafter
- Upstream production averaging 440kboepd over 2023-2027
- Capex, excluding exploration and decommissioning, averaging around USD4.5 billion per year over 2023-2027
- Dividends of around USD1.4 billion-1.6 billion a year in 2023-2027

How to Interpret the Forecast Presented

The forecast presented above is based on Fitch Ratings' internally produced, conservative rating case forecast. It does not represent the forecast of the rated issuer. The forecast set out above is only one component used by Fitch Ratings to assign a rating or determine a rating outlook, and the information in the forecast reflects material but not exhaustive elements of Fitch Ratings' rating assumptions for the issuer's financial performance. As such, it cannot be used to establish a rating, and it should not be relied on for that purpose. Fitch Ratings' forecasts are constructed using a proprietary internal forecasting tool, which employs Fitch Ratings' own assumptions on operating and financial performance that may not reflect the assumptions that you would make. Fitch Ratings' own definitions of financial terms such as EBITDA, debt or free cash flow may differ from your own such definitions. Fitch Ratings may be granted access, from time to time, to confidential information on certain elements of the issuer's forward planning. Certain elements of such information may be omitted from this forecast, even where they are included in Fitch Ratings' own internal deliberations, where Fitch Ratings, at its sole discretion, considers the data may be potentially sensitive in a commercial, legal or regulatory context. The forecast (as with the entirety of this report) is produced strictly subject to the disclaimers set out at the end of this report. Fitch Ratings may update the forecast in future reports but assumes no responsibility to do so. Original financial statement data for historical periods is processed by Fitch Solutions on behalf of Fitch Ratings. Key financial adjustments and all financial forecasts credited to Fitch Ratings are generated by rating agency staff.

Credit-Relevant ESG Derivation

| | | | | Overall ESG | | |
|---|--|---------------------|-----------|-------------|----------|---|
| Aker BP ASA has 12 ESG potential rating drivers | | | | key driver | 0 issues | 5 |
| ➡ | Emissions from OGP production | driver | 0 issues | 4 | | |
| ➡ | Energy use in OGP operations | potential driver | 12 issues | 3 | | |
| ➡ | Water management (e.g. usage levels, recycling capacity) | not a rating driver | 1 issues | 2 | | |
| ➡ | Waste and material handling; operations proximity to environmentally sensitive areas | | | | | |
| ➡ | Hydrocarbon reserves exposure to present/future regulation and environmental costs | | | | | |
| ➡ | Operations proximity to areas of conflict or indigenous lands | | | | | |
| Showing top 6 issues | | | | | | |

For further details on Credit-Relevant ESG scoring, see page 3.

Credit-Relevant ESG Derivation

Aker BP ASA has 12 ESG potential rating drivers

- ➔ Aker BP ASA has exposure to emissions regulatory risk but this has very low impact on the rating.
- ➔ Aker BP ASA has exposure to energy productivity risk but this has very low impact on the rating.
- ➔ Aker BP ASA has exposure to water management risk but this has very low impact on the rating.
- ➔ Aker BP ASA has exposure to waste and impact management risk but this has very low impact on the rating.
- ➔ Aker BP ASA has exposure to extreme weather events but this has very low impact on the rating.
- ➔ Aker BP ASA has exposure to land rights/conflicts risk but this has very low impact on the rating.

| | | | | Overall ESG Scale | |
|---------------------|----|--------|---|---|--|
| key driver | 0 | issues | 5 | <div style="width: 100%; height: 10px; background-color: #f08080;"></div> | |
| driver | 0 | issues | 4 | <div style="width: 100%; height: 10px; background-color: #f0e68c;"></div> | |
| potential driver | 12 | issues | 3 | <div style="width: 100%; height: 10px; background-color: #f0e68c;"></div> | |
| not a rating driver | 1 | issues | 2 | <div style="width: 100%; height: 10px; background-color: #90ee90;"></div> | |
| | 1 | issues | 1 | <div style="width: 100%; height: 10px; background-color: #32cd32;"></div> | |

Environmental (E)

| General Issues | E Score | Sector-Specific Issues | Reference |
|--|---------|--|--|
| GHG Emissions & Air Quality | 3 | Emissions from OGP production | Diversification and Environmental Risk; Profitability |
| Energy Management | 3 | Energy use in OGP operations | Diversification and Environmental Risk; Profitability |
| Water & Wastewater Management | 3 | Water management (e.g. usage levels, recycling capacity) | Diversification and Environmental Risk; Profitability |
| Waste & Hazardous Materials Management; Ecological Impacts | 3 | Waste and material handling; operations proximity to environmentally sensitive areas | Diversification and Environmental Risk; Profitability |
| Exposure to Environmental Impacts | 3 | Hydrocarbon reserves exposure to present/future regulation and environmental costs | Diversification and Environmental Risk; Profitability; Financial Flexibility |

How to Read This Page

ESG scores range from 1 to 5 based on a 15-level color gradation. Red (5) is most relevant and green (1) is least relevant.

The Environmental (E), Social (S) and Governance (G) tables break out the individual components of the scale. The right-hand box shows the aggregate E, S, or G score. General Issues are relevant across all markets with Sector-Specific Issues unique to a particular industry group. Scores are assigned to each sector-specific issue. These scores signify the credit-relevance of the sector-specific issues to the issuing entity's overall credit rating. The Reference box highlights the factor(s) within which the corresponding ESG issues are captured in Fitch's credit analysis.

The Credit-Relevant ESG Derivation table shows the overall ESG score. This score signifies the credit relevance of combined E, S and G issues to the entity's credit rating. The three columns to the left of the overall ESG score summarize the issuing entity's sub-component ESG scores. The box on the far left identifies the some of the main ESG issues that are drivers or potential drivers of the issuing entity's credit rating (corresponding with scores of 3, 4 or 5) and provides a brief explanation for the score.

Classification of ESG issues has been developed from Fitch's sector ratings criteria. The General Issues and Sector-Specific Issues draw on the classification standards published by the United Nations Principles for Responsible Investing (PRI) and the Sustainability Accounting Standards Board (SASB).

Social (S)

| General Issues | S Score | Sector-Specific Issues | Reference |
|--|---------|---|--|
| Human Rights, Community Relations, Access & Affordability | 3 | Operations proximity to areas of conflict or indigenous lands | Diversification and Environmental Risk; Profitability; Financial Flexibility |
| Customer Welfare - Fair Messaging, Privacy & Data Security | 1 | n.a. | n.a. |
| Labor Relations & Practices | 3 | Impact of labor negotiations and employee (dis)satisfaction | Profitability; Financial Structure; Financial Flexibility |
| Employee Wellbeing | 2 | Worker safety and accident prevention | Diversification and Environmental Risk; Profitability; Financial Flexibility |
| Exposure to Social Impacts | 3 | Social resistance to major projects or operations that leads to delays and cost increases | Production Size; Profitability; Financial Structure; Financial Flexibility |

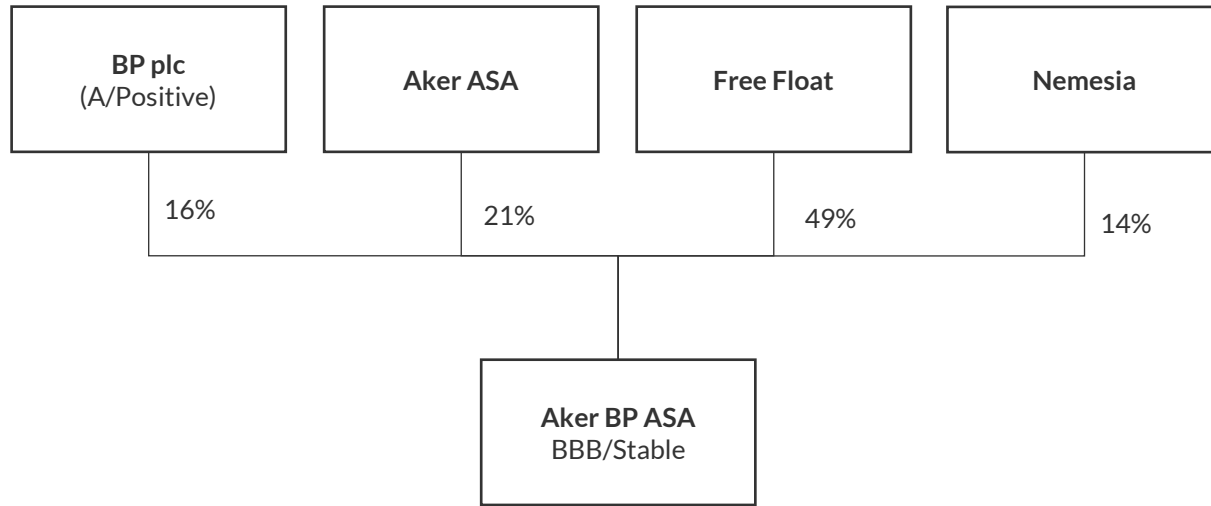

Governance (G)

| General Issues | G Score | Sector-Specific Issues | Reference |
|------------------------|---------|---|-------------------------------------|
| Management Strategy | 3 | Strategy development and implementation | Management and Corporate Governance |
| Governance Structure | 3 | Board independence and effectiveness; ownership concentration | Management and Corporate Governance |
| Group Structure | 3 | Complexity, transparency and related-party transactions | Management and Corporate Governance |
| Financial Transparency | 3 | Quality and timing of financial disclosure | Management and Corporate Governance |

| CREDIT-RELEVANT ESG SCALE | |
|--|---|
| How relevant are E, S and G issues to the overall credit rating? | |
| 5 | Highly relevant, a key rating driver that has a significant impact on the rating on an individual basis. Equivalent to "higher" relative importance within Navigator. |
| 4 | Relevant to rating, not a key rating driver but has an impact on the rating in combination with other factors. Equivalent to "moderate" relative importance within Navigator. |
| 3 | Minimally relevant to rating, either very low impact or actively managed in a way that results in no impact on the entity rating. Equivalent to "lower" relative importance within Navigator. |
| 2 | Irrelevant to the entity rating but relevant to the sector. |
| 1 | Irrelevant to the entity rating and irrelevant to the sector. |

For information on the solicitation status of the ratings included within this report, please refer to the solicitation status shown in the relevant entity's summary page of the Fitch Ratings website.

For information on the participation status in the rating process of an issuer listed in this report, please refer to the most recent rating action commentary for the relevant issuer, available on the Fitch Ratings website.

DISCLAIMER & DISCLOSURES

All Fitch Ratings (Fitch) credit ratings are subject to certain limitations and disclaimers. Please read these limitations and disclaimers by following this link: <https://www.fitchratings.com/understandingcreditratings>. In addition, the following <https://www.fitchratings.com/rating-definitions-document> details Fitch's rating definitions for each rating scale and rating categories, including definitions relating to default. Published ratings, criteria, and methodologies are available from this site at all times. Fitch's code of conduct, confidentiality, conflicts of interest, affiliate firewall, compliance, and other relevant policies and procedures are also available from the Code of Conduct section of this site. Directors and shareholders' relevant interests are available at <https://www.fitchratings.com/site/regulatory>. Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.
